1. touch sample1.txt -- press Enter
2. ls -- press Enter
3. touch sample2.txt -- press Enter
4. ls -- press Enter

5. touch sample3.txt -- press Enter
6. ls -- press Enter
7. touch sample4.txt -- press Enter
8. ls -- press Enter
9. touch sample5.txt -- press Enter
10. ls -- press Enter
11. rm sample5.txt -- press Enter

- tree command
    1. tree -- press Enter

    2. mkdir EH -- press Enter
    3. cd EH -- press Enter
    4. touch Lile1.txt -- press Enter
    5. tree -- press Enter

    6. mkdir Unit1 -- press Enter
    7. cd Unit1 -- press Enter
    8. touch topic1.txt -- press Enter
    9. touch topic2.txt -- press Enter

10. touch topic3.txt -- press Enter
11. touch topic4.txt -- press Enter
12. touch topic5.txt -- press Enter
13. tree -- press Enter

Result:
Thus, the rm, tree, and users commands were studied in Kali Linux. The rm command was used to delete sample5.txt, and the tree command displayed the directory structure and files within the created directories.
